Office Action Summary	Application No. 10/648,549	Applicant(s) BENNETT, JON CLAUDE RUSSELL	
	Examiner CLEMENCE HAN	Art Unit 2416	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moriarty (US Pub.2002/0161755) in view of McGregor (IPMP draft-mcgregor-ipmp-00.txt).

Regarding claim 1, 6 and 11, Moriarty teaches a method for performing a measurement in a network comprising: creating an performance measurement packet (step 10 in Figure 3) by a measurement host; including in the performance measurement packet instructions for a recipient of the performance measurement packet, said instructions including instructions to a recipient to provide specified information 23 (TTL (Time to live), see [0027]) and an instruction to a recipient to insert any additional data (RTT (round trip time), see [0027]) desired by the recipient in the performance measurement packet when forwarding the performance measurement packet. Moriarty, however, does not teach the performance measurement packet as Internet Protocol Measurement Protocol (IPMP) packet. McGregor teaches performance measurement packet as IPMP packet. It would have been obvious to one skilled in the art to modify

Moriarty to use IPMP packet to measure performance as taught by McGregor in order to avoid denial of service attack (page 1 Abstract section third paragraph).

Regarding claim 2, 7 and 12, Moriarty teaches encapsulating the performance measurement packet in an Internet Protocol (IP) datagram and a predetermined link layer protocol (ICMP packet is encapsulated in IP packet, see [0003]).

Regarding claim 3, 8 and 13, Moriarty teaches sending (step 12 in Figure 3) the performance measurement packet into the network from the measurement host.

Regarding claim 4, 9 and 14, Moriarty teaches the additional data includes traffic levels (RTT are dependent on the traffic level, see [0027]).

Regarding claim 5, 10 and 15, Moriarty teaches the additional data includes environmental data, weather data or other information (RTT, see [0027]) that may impact communications link performance (longer RTT usually means poor communication link).

Response to Arguments

3. Applicant's arguments with respect to claim 1-15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CLEMENCE HAN whose telephone number is (571)272-3158. The examiner can normally be reached on Monday-Friday 8-4.
